

Long Range Antenna Gate "EzaX"

The iDTRONIC EzaX ISO15693 Long Range antenna is a high performance solution for access control applications. It is designed to work perfectly with the iDTRONIC EzScan LR reader.

It is possible to get reading distances up to 150cm (depending on tag type and antenna configuration). The EzaX has a very nice design with dark grey reinforced basis with aluminium tube antenna.

Applications:

- Access Control
- Logistics
- Product Identification

Product specification:

| | |
|-----------------------------|--|
| Dimensions: | 163 x 64 x 16cm |
| Weight: | 2 x 11kg |
| Material: | dark grey reinforced basis aluminium tube antenna |
| Operating distance : | Up to 150cm read/write (depending on tag type and antenna configuration) |
| Operating frequency: | 13,56MHz (ISO15693) |
| Interface: | BNC Connector |
| Humidity resistance: | IP 54 |
| RF rating: | up to 5W each |
| Temperature range: | 0 ↔ 50C° |
| Order number: | R-EZ-LR-EZAXAN (set of 2 antennas) |
