

Desktop Reader/Writer “AXR200” - 125 kHz

The iDTRONIC desktop reader versions allow the administration (reading and writing) of all well known 125kHz transponders. The USB interface shows its advantage in a convenient connection to the PC.

The special features of the AXR desktop reader is the excellent design and an illuminated frame, turning on during the card / tag reading process.

All iDTRONIC desktop readers come with application software for Read/Write
