

## Antenna Tuning Board

The iDTRONIC Antenna Tuning Board is used for building ISO15693 antennas for long range applications, industrial applications and antenna gates.

Thanks to 3 integrated capacitors, it is possible to do fine tuning of the antenna according the specific need of the application and the environment.

### Product specification:

<b>Dimensions:</b>	80 x 70 x 30mm
<b>Weight:</b>	200g
<b>Material:</b>	PCB Board
<b>Max. power:</b>	8W
<b>Interface:</b>	1 x BNC (50Ohm) input channel from reader
<b>Temperature range :</b>	-25 ↔ 85C°
<b>Order number:</b>	R-EZ-AN-TUN-BD
