HID NFC Label range extended

Now available: **Paper Labels and Wet Inlays, round, diameter 29mm or 40mm.**

HID Global's NFC Inlays & Labels enable marketers to quickly and cost-effectively integrate digital touch points into physical media – including posters, product packaging, point-of-purchase displays, and magazines.

Features:

- Advanced technology NXP NTAG213 chip
- NFC Forum Tag Type 2 compliant
- ISO/IEC 14443A compliant
- Program tags and print labels with standard equipment

Confidex range extended. Now available: Confidex Carrier tough

Confidex Carrier Tough™ is an encapsulated, thin tag solution for tracking various plastic containers and plastic returnable transit items. The tag's structure gives protection against impacts, but it also covers the barcode or other visual information making the printing tolerant against scratches or other wearing.
