INDUSTRY AND LOGISTICS

HIGH PRESSURE CONDITIONS AND EXTREME TEMPERATURES

DISCREET RFID TAGS THAT WITHSTAND LIQUID IMMERSION,

- Inconspicuous Compact form factors conceal easily in textile assets, hand tools or small equipment.
- Durable Resistant to extreme temperature, chemicals, fluids, industrial detergents and high pressure.
- Powerful Rapid, accurate asset identification and data storage, with anti-collision functionality for simultaneous processing of multiple items.

TECHNOLOGY HIGHLIGHTS:

- LF 125 kHz or HF 13.56 MHz / NFC
- ISO 15693/18000-3 (HF)
- 64-bit UID; up to 8KB read-write user memory, crypto options (Vigo™ 2K)
- Anti-collision, multi-read capable (HF)
- High chemical and mechanical resistance
- Temperature resistant up to 347° F (175° C)
- Options for mounting on metal or nonmetal surfaces, or radiation resistant FRAM

APPLICATION AREAS:

- ASSET TRACKING AND LOGISTICS
 - Inventory
 - Tools and small equipment
- LAUNDRY
 - Automated accounting of cleaning
 - Automated sorting and inventory
 - Clothing, uniforms
 - Commercial laundry
 - Owner identification
- MEDICAL AND HEALTH
 - Hospital laundry
 - Medical and surgical accessories

HID Global Logi Tag™ transponders endure severe conditions while protecting data integrity. These small, thin discs enable discreet placement in a broad range of applications.

The smallest Logi Tag discs are ideal for tagging industrial tools and small equipment. Among the smallest HF tags available, Logi Tag 081 and 121 units are assembled using patented DBond™ Vigo™ technology that enables HID Global to produce tags in thinner, smaller formats without compromising performance. They mount with industrial adhesives, with options for metal or non-metal surfaces. Logi Tag HF transponders are NFC Tag Type 5 compliant when formatted with NDEF data structure.

Uniform management companies use Logi Tag transponders to increase garment productivity by 20 percent, reduce throughput by 15 percent, and decrease stock requirements per customer by an average of 12 percent. As part of a commercial laundry logistics system, Logi Tag discs ensure accurate item counting and documentation, while enabling automatic billing and real-time inventory control.

Logi Tag discs enable medical facilities automatically track clothing, linens, rags, surgical sponges, and life-saving equipment. Effective tracking of reusable assets and verification of cleaning and sterilization procedures ensures better patient and staff safety through improved infection control.

Logi Tag discs are easily sewn into the hem or seam of a garment, uniform, napkin, tablecloth or runner. They may also be affixed to custodial supplies, such as mats, mops, washrags and towels. The Logi Tag Button 162 transponder is indistinguishable from ordinary buttons, and can be sewn onto clothing with standard stitching equipment and processes.

Logi Tag transponders empower logistics applications that are optimized via radio frequency identification (RFID) technology, enabling more accurate, efficient asset management and inventory control processes. Logi Tag discs are compliant with standard RFID readers and modules, and are ATEX certified for safe use in potentially explosive environments. LogiTag 161 is also available in a radiation resistant, high-memory FRAM option for most demanding application scenarios.
