

# BLUEBOX HF

## Antenna Long-Range

iDTRONIC's BLUEBOX Controller & Antenna family is well suited for industrial and enterprise applications, where reliable, robust and well performing products are needed. All components are designed as a powerful combination for an easy and cost efficient system installation.

iDTRONIC's Long-Range Antenna HF is a high-performance device which can be used in combination with the BLUEBOX HF Controller, for example. It enables the HF reading of up to 80 cm (depending on type of tag).

- Small dimension
- Stable performance
- Circular polarized
- Easy to integrate with HF Controller
- Able to read out multiple disorientated tags
- Operation RF Frequency of 13.56 MHz
- All BLUEBOX HF products are CE certified.

### Applications:

- Industrial Automation
- Supply Chain
- Asset Tracking
- Gates

## Technical Data

### Specifications

Housing-Material:	POM
Dimensions:	240 × 240 × 50 mm 320 × 480 × 50 mm
Protection Class:	IP65
Cable Length:	1.2 m
Antenna Connector:	TNC
Operating Frequency:	13.56 MHz
Operating Distance:	Up to 80 cm

### Environmental Conditions

Operating Temperature:	-20 °C to +55 °C
Humidity:	5 % to 95 %

### Supported Transponders

ISO14443A + Mifare Family
ISO15693
ISO18000-3

### Applicable Standards

Radio Regulation:	CE
-------------------	----

### Order Codes

240×240×50 mm:	9224HM	320×480×50 mm:	9225HM
----------------	--------	----------------	--------
