

# New in The RFID Shop

October 2018

## Now available in The RFID Shop

### New UHF Inlays and Labels

Both non-metal and on-metal tags now available

#### EFFICIENTLY TAG LARGE QUANTITIES OF METALLIC OR NON-METALLIC ASSETS TO ENABLE POWERFUL RFID APPLICATIONS

- Effortless integration      Simply apply tags to your assets.
- Ready adoption              Interoperable with RAIN UHF RFID compliant devices.
- Enhanced effectiveness      Faster, more accurate than QR-codes or text transactions.

#### Non-metal Inlays and Labels

For industrial applications, UHF Inlays & Labels enhance the speed and accuracy of inventory and process management systems. Using RAIN® RFID technology, each labelled asset can be identified in the supply chain or connected via Internet of Things (IoT), enabling businesses and consumers to identify, locate, authenticate and engage each item.

Typical applications include:

- RTI
- Asset management
- Logistic / Supply Chain Management
- Industry
- Sport Timing

HID Global Inlays & Labels are small, thin self-adhesive tags that allow discreet or overt placement.

#### On-metal Labels

These white PET labels are only 1.2 mm thin and may be encoded and printed in standard label printers to apply logos, bar-codes, QR codes or text. Their flexible special shielding allows application on flat or curved metallic objects like liquid containers, laptops, pipes or machinery.

For industrial applications, UHF on-metal labels enhance the speed and accuracy of inventory and process management systems.

Typical applications include: Asset Tracking

#### The RFID Shop is a HID Silver Advantage Partner

Our membership certifies that customers can purchase HID products and solutions with absolute confidence in quality, performance and support at The RFID Shop.
